

## CONTENTS

<b>1</b>	<b>EXECUTIVE SUMMARY.....</b>	<b>1-1</b>
	CURRENT STATUS OF GHG REGULATION.....	1-1
	Kyoto Ends in 2012 .....	1-2
	The Nascent Carbon Market .....	1-3
	A Best Available Technology Approach .....	1-6
	THE CARBON FOOTPRINT OF THE PETROCHEMICAL INDUSTRY .....	1-7
	HOW BIG IS THE IMPACT OF GHG REGULATION LIKELY TO BE? .....	1-8
	SUMMARY OF OUR FINDINGS .....	1-10
	Characteristics of the Processes Most Impacted .....	1-10
	Areas Where Chemical Processes are Likely to Change .....	1-11
	Natural Gas vs. Coal .....	1-12
	Winners and Losers.....	1-13
<b>2</b>	<b>GLOBAL GREENHOUSE GAS EMISSIONS STANDARDS AND FUTURE OUTLOOK.....</b>	<b>2-1</b>
	BACKGROUND TO AND STRUCTURE OF THE KYOTO PROTOCOL .....	2-2
	HOW THE KYOTO PROTOCOL WAS ESTABLISHED .....	2-2
	WHAT ARE THE KYOTO PROTOCOL'S AIMS, AND HOW DOES IT WORK? .....	2-2
	THE UNITED NATIONS FRAMEWORK CONVENTION ON CLIMATE CHANGE AND THE KYOTO PROTOCOL.....	2-3
	THE CLEAN DEVELOPMENT MECHANISM AND CERTIFIED EMISSION REDUCTION PERMITS.....	2-4
	HOW CERS ARE PRODUCED, CALCULATED AND PRICED .....	2-6
	CURRENT CER TRADING MARKET, MARKET SUPPLY AND DEMAND BY CUSTOMERS.....	2-7
	HFC-23 Reduction and CERs: Will Any More HFC-23 Projects be Approved? .....	2-10
	Five Scenarios for the Future of the CDM and HFC-23.....	2-11
	CHANGES IN THE IMPLEMENTATION OF KYOTO .....	2-12

## CONTENTS (Continued)

THE US MARKET AND POLITICAL CLIMATE REGARDING CLIMATE CHANGE .	2-15
EUROPEAN POLICIES TO REDUCE GHGS.....	2-16
KYOTO IMPLEMENTATION.....	2-17
NATIONAL GHG INVENTORIES.....	2-17
NATIONAL PLANS TO REDUCE GHGS.....	2-17
EA MEASURES AIMED AT GHG REDUCTION.....	2-18
BIOFUELS PROMOTION.....	2-18
CARBON TAXATION.....	2-18
COMBINED HEAT AND POWER PROMOTION.....	2-19
ELECTRICITY FROM RENEWABLE FUELS.....	2-19
EMISSIONS CAP (WITH OPTIONAL TRADING).....	2-20
ENERGY EFFICIENCY.....	2-20
F-GAS REGULATION.....	2-20
FUEL EFFICIENCY, VOLUNTARY AGREEMENT WITH AUTOMAKERS.....	2-20
VEHICLE TAXATION.....	2-20
WHERE THE US STANDS IN 2007.....	2-21
<b>3 CARBON COMPLIANCE, FROM A CHEMICAL PRODUCER'S PERSPECTIVE...</b>	<b>3-1</b>
GENERAL GHG REGULATIONS: PUSHING ENERGY EFFICIENCY.....	3-1
GHG EMISSION CAPS: SAY HELLO TO CARBON TRADING.....	3-2
Emission Caps: What, Where and When?.....	3-2
Who or What is Subject to GHG Emission Caps?.....	3-3
How are Caps Set?.....	3-5
Application of GHG Emission Caps to Chemical Plants.....	3-7
GHG Emissions Trading and Transfer: How it Works.....	3-9
Applications for and Grants of Allowances.....	3-9
Monitoring, Reporting, Verification and Penalties.....	3-10

## CONTENTS (Continued)

Trading.....	3-11
Carbon Markets.....	3-12
<b>4 COST EFFECTS OF GHG CAPS ON THE CHEMICAL INDUSTRY .....</b>	<b>4-1</b>
CARBON INDUSTRY OF MAJOR CHEMICALS.....	4-1
Most CO <sub>2</sub> -Intensive (Emitters).....	4-1
Chloralkali Producers .....	4-3
CO <sub>2</sub> -Consumers .....	4-4
Less CO <sub>2</sub> -Intensive (Emitters).....	4-4
WILL CARBON-INTENSE CHEMICALS BE CAPPED? .....	4-7
REGULATORY SPECIFICS: HOW CAPS CAN SET CARBON PRICES .....	4-8
Baseline Accounting of Emissions .....	4-8
Reduction Targets and Allowances for Emissions.....	4-9
Definition of Emitters .....	4-10
Allocating Allowances: Auctions, Benchmarks or Precedents? .....	4-10
WINNERS AND LOWERS: OPERATING IMPACTS OF CAPS.....	4-11
<b>5 METHODOLOGY .....</b>	<b>5-1</b>
TECHNICAL BASIS.....	5-1
Carbon Dioxide.....	5-1
Methane.....	5-1
Nitrous Oxide.....	5-1
CFCs.....	5-2
PFCs.....	5-2
Sulfur Hexafluoride .....	5-2
OUR CONVENTION FOR ACCOUNTING FOR EMISSIONS.....	5-2
Process Emissions .....	5-3
Emissions from On-Site Combustion .....	5-3

## CONTENTS (Continued)

Emissions from Off-Site Electrical Generation .....	5-3
HOW WE ARRIVED AT THESE EMISSIONS ESTIMATES.....	5-3
Calculating Process Emissions .....	5-11
Calculating Emissions from On-Site Combustion .....	5-15
Calculating Emissions from Off-Site Combustion .....	5-16
Emissions Allocation.....	5-16
Cumulative Emissions Estimates .....	5-17
Uncertainties in Emissions Factor Estimates .....	5-18
<b>6 WHAT THE DATA TELLS US .....</b>	<b>6-1</b>
NON-CO <sub>2</sub> GREENHOUSE GASES.....	6-1
Methane .....	6-1
Nitrous Oxide.....	6-1
Other Classes of GHG.....	6-2
LESSONS WE CAN DRAW FROM THE DATA.....	6-2
Characteristics of the Processes Most Impacted .....	6-2
Areas Where Chemical Processes are Likely to Change .....	6-3
All-Coal Basis .....	6-4
A Note Regarding Hydrogen .....	6-5
<b>7 BENCHMARKING CARBON FOOTPRINTS .....</b>	<b>7-1</b>
METHODOLOGY .....	7-1
RESULTS .....	7-2
TOP EMITTERS AND THE WORLDWIDE PETROCHEMICAL FOOTPRINT .....	7-9

**CONTENTS (Concluded)**

<b>APPENDIX A: CO2 EMISSION FACTORS.....</b>	<b>A-1</b>
<b>APPENDIX B: EMISSIONS FACTORS.....</b>	<b>B-1</b>
<b>APPENDIX C: CUMULATIVE EMISSIONS FACTORS.....</b>	<b>C-1</b>
<b>APPENDIX D: PROCESS FLOW DIAGRAM.....</b>	<b>D-1</b>

## ILLUSTRATIONS

1.1	European Climate Exchange Carbon Futures Prices .....	1-4
1.2	European Climate Exchange Futures Prices .....	1-5
1.3	Chinese CO <sub>2</sub> Emissions from Olefins Manufacture, 2000-2016 .....	1-6
1.4	Total World CO <sub>2</sub> Emissions from Petrochemical Manufacture, 2000-2016 .....	1-7
1.5	Top Ten Emitting Products, 2007 .....	1-8
2.1	Value of HFC Projects as a Share of Total CDM Value, 2005-Mid 2007 .....	2-8
3.1	The Annual Cycle of GHG Monitoring, Reporting and Verification .....	3-10
3.2	A Hypothetical Example of Allowances and Trading Under ETS.....	3-11
5.1	Ethylene-Vinyl Acetate Copolymers by a Tubular Reactor Process Process Flow Diagram .....	D-3
5.2	Cumulative Emissions Calculation Example .....	5-18
7.1	Top Four Regional Emitters, Olefins (2000-2016) .....	7-2
7.2	CO <sub>2</sub> Emissions from Olefins Manufacture, Asia, 2000-2016 .....	7-3
7.3	CO <sub>2</sub> Emissions from Manufacture, North America, 2000-2016 .....	7-4
7.4	CO <sub>2</sub> Emissions from Manufacture, Western Europe, 2000-2016 .....	7-5
7.5	CO <sub>2</sub> Emissions from Manufacture, Middle East, 2000-2016.....	7-6
7.6	Top Five CO <sub>2</sub> Emitters from Olefins Manufacture, 2000-2016.....	7-7
7.7	Chinese CO <sub>2</sub> Emissions from Olefins Manufacture, Asia, 2000-2016.....	7-8
7.8	Saudi Arabian CO <sub>2</sub> Emissions from Olefins Manufacture, Asia, 2000-2016.....	7-9
7.9	Top Ten Emitting Products, 2007 .....	7-10
7.10	Total World CO <sub>2</sub> Emissions from Olefins Manufacture, 2000-2016.....	7-11
C.1	Cumulative Emissions Polycarbonate Production Chain.....	C-4
C.2	Cumulative Emissions Nylon 66 Production Chain.....	C-5
C.3	Cumulative Emissions Polyolefins Production Chain .....	C-6
C.4	Cumulative Emissions Polyvinyl Production Chain.....	C-7

## ILLUSTRATIONS (Concluded)

C.5	Cumulative Emissions Toluene Diisocyanate Production Chain.....	C-8
C.6	Cumulative Emissions Polystyrene Production Chain .....	C-9

## TABLES

1.1	Carbon Dioxide Cost as Percentage of Margin Over Variable Cost .....	1-9
1.2	Emissions Factors Sorted by Carbon Intensity, US Gulf Coast Basis .....	1-14
1.3	Emissions Factors Sorted by Carbon Intensity, 100% Coal Basis.....	1-18
2.1	Top 20 Countries by Carbon Dioxide Emissions Per Capita .....	2-5
2.2	Annual Volumes and Values (2005-2006) for Project-Based Transactions.....	2-7
2.3	Leading CDM Project Proposals, 1 <sup>st</sup> Quarter 2007 .....	2-9
2.4	Leading CER Buyers, 2006.....	2-9
2.5	Volumes Exchanged and Number of Transactions per Market Segment.....	2-14
2.6	Carbon Price Comparison .....	2-15
3.1	Installations or Facilities Subject to GHG Caps under the EU ETS .....	3-4
3.2	GHG Inventories from Germany's National Allocation Plan.....	3-5
3.3	Germany's GHG Budgets, 2005-2007 and 2008-2012.....	3-7
3.4	LETS Update is Proposing These 'Petrochemical' Definitions.....	3-9
3.5	Carbon Exchanges .....	3-12
4.1	The Most CO <sub>2</sub> -Intensive Chemicals: Ranked According to CO <sub>2</sub> as a % of Variable Costs of Production .....	4-2
4.2	Chloralkali Production Chlorine (with NaOH Byproduct) by Electrolysis of NaCl in Diaphragm Cells .....	4-4
4.3	CO <sub>2</sub> -Consuming Chemicals.....	4-4
4.4	Less CO <sub>2</sub> -Intensive Chemicals: Ranked According to CO <sub>2</sub> as a % of Variable Costs of Production .....	4-5
5.1	EVAs by a Tubular Reactor Process Major Equipment .....	5-5
5.2	EVAs by a Tubular Reactor Process Stream Flows.....	5-7
5.3	EVAs by a Tubular Reactor Process Production Costs .....	5-8
5.4	GHG Sample Page.....	5-10
5.5	Streams Exiting Process of Figure 5.1 Stream Flows.....	5-12

## TABLES (Concluded)

5.6	Carbon Content of Streams Exiting Process in Figure 5.1 Stream Flows.....	5-14
5.7	CO <sub>2</sub> Uncontrolled Emissions Factors from Combustion .....	5-15
5.8	Processes with Emissions Allocated to Multiple High Value Products .....	5-17
6.1	Nitrous Oxide Emissions Factors (Uncontrolled) .....	6-2
B.1	CO <sub>2</sub> Uncontrolled Emissions Factors .....	B-3
B.2	CO <sub>2</sub> Emissions (Grams per kwh) from Electricity and Heat Generation Averages .....	B-4
B.3	Carbon Dioxide Emissions Factors - US Gulf Coast.....	B-8
B.4	Carbon Dioxide Emissions Factors - US Gulf Coast, Ranked by Total Emissions .....	B-15
B.5	Carbon Dioxide Emissions Factors - US Gulf Coast, Ranked by Process Emissions .....	B-22
B.6	Carbon Dioxide Emissions Factors - US Gulf Coast, Ranked by Direct Emissions .....	B-29
B.7	Carbon Dioxide Emissions Factors - US Gulf Coast, Ranked by Indirect Emissions .....	B-36
B.8	Carbon Dioxide Emissions Factors - China .....	B-43
B.9	Carbon Dioxide Emissions Factors - France.....	B-50
B.10	Carbon Dioxide Emissions Factors - Germany.....	B-57
B.11	Carbon Dioxide Emissions Factors - Japan .....	B-64
B.12	Carbon Dioxide Emissions Factors - All Coal .....	B-71
B.13	Carbon Dioxide Emissions Factors - All Coal Sorted.....	B-78
